

Your success counts

Weatherproof Flow Logger / Totalizer

for liquid and gas flow applications

Application examples: Hot and sandy deserts

Flow logging at harsh conditions

Water and chemical flow monitoring at oil wells

Robust and user-friendly!

- CSA Class I, Div. 2, Non-Incendive rating for the USA and Canada.
- Excellent performance in harsh weather conditions like rain, snow, sandy deserts and temperatures between -40°F up to 158°F.
- The F103 can easily replace MC-III WP flow analyzers, thanks to 1-on-1 wiring transfer and the selectable Modbus table.
- Intuitive “Know one, know them all!” configuration menu, saving time, cost and aggravation.
- Excellent pricing and fast delivery times.

Features

- Flow logging with 600 daily, 1500 interval and 724 event logs.
- Displays simultaneous flow rate and total, as well as accumulated total, daily total and the last 15 previous day totals.
- Large display with 0.7” numeric and 0.3” alphanumeric digits.
- 15 linearization points to ensure high accuracy at the full flow range.
- Auto backup of settings and running totals.
- Digital scaled, unscaled and “isolated solid state” outputs, isolated loop powered analog 4-20mA output and Modbus communication
